

# Real Estate Broker Providing Agent Intelligence

09.06.2012 | posted by camilleb |    

If you are in the process of moving to or from San Antonio, there is a company that can make the job less stressful. Energized Real Estate isn't your typical real estate broker. Instead, they are advisors who work along side you AND your real estate agent to better ensure a successful transaction.

energized real estate lg If you are selling, they provide you with amazing market intelligence and send a professional home-stager to you in order to prepare your home for the market.

If you are buying, they go through market data in order to find you the best deal possible in the area you wish to live and help you look at your home as an investment.

Also, instead of assigning you to a REALTOR that works for them, they show you valuable data to help you choose an agent in San Antonio who is right for you.

They review the statistics of over 7,000 REALTORS in San Antonio and narrow it down to 3-5 who are proven successful in your area and home price range. They then help you through the interview process until you pick one. Energized Real Estate believes working with proven successful people will improve your likelihood of success, and therefore create a less stressful home selling and buying experience.

They don't stop helping after you choose an agent though. They stay with you as advisors until you close a deal and are completely satisfied.

Energized Real Estate is making the move much easier for people who are staying in, leaving or joining the San Antonio community, and, best of all, other than a \$175 refundable consult fee, they are paid by a referral fee from your agent.

You will be amazed by the value they provide and won't want to do any San Antonio real estate transaction without them.
