Using a Different Wiki Page

In this section you will create a new wiki page and use this page as your site's Home page.

To use a different wiki page:

1. Create a new wiki page named Welcome. You can use the either method of creating a wiki page, do you remember how?

   ![Edit Welcome](image)

   The new home page, named Welcome. Notice that I have included a link to the old home page by using `((HomePage|This))`. 

2. From the Admin menu, click Settings > Control Panels.

   ✓ TIP

   You can also access the Administration page by using the Control Panels link in the Quick Admin area.

3. From the Control Pane page, click Wiki.

   ✓ TIP

   You can also access the Administration page by typing `http://www.yourdomain.com/tiki-admin.php?page=wiki` in your web browser.

4. On the General Preferences tab, in the Home Page field select name of the page you created (Welcome) and click Apply. Tiki saves the information and reloads the page.
Now log out. Tiki displays your site's home page by default: the **Welcome** page.

But what if you do not want to use a wiki page as your home page...
