- Fits most standard traffic cones.
- Simply insert into hole on top of the cone.
- Powered by two D size batteries (not included).
- Available in flashing Red or White.
- Switches on automatically in low-light.
- Twist to switch on and off.

Traffic cone light for use in low light conditions

Traffic cones are highly used on roads or footpaths to temporarily and safely redirect traffic, merge lanes during road works, close-off hazardous areas and a variety of other useful tasks.

LED cone lights are ideal for personnel and traffic management use and they fit onto safety cones to provide high visibility in wet, raining low-light and night conditions. Requires two D size batteries for operation (batteries not included). Blinking LED beacon is easy to install onto standard and collapsible safety traffic cones.
