

Linebacker Asset Protection Barrier

Linebacker Brace Reinforced

The Linebacker BR is a storefront protective barrier designed as a last line of defence when it comes to the safety and protection of shop front displays and assets against unintentional drive-through vehicle crashes.

These are an ideal protective device for situations where surface mounting with very shallow fixing is required. Twin base plates and diagonal bracing mean the BR is extremely strong, making it ideal for asset protection installations where the rear brace can be embedded within merchandising units out of the way of pedestrians.

Unlike a conventional surface mounted bollard, loads are transmitted down the bollard and through the diagonal brace to the dual base plates allowing it to withstand heavy impacts.

Product Features:

- Much stronger than conventional bollards.
- No risk to underground services.
- Provides improved protection against drive-throughs.
- Hot dip galvanised and powder coated finish.
- Embedment into merchandising units conceals brace.
- Can be installed on sloping or stepped ground.

Part Numbers

Code	Image	Product Name
LBR90-SM		Linebacker Brace Reinforced Bollard 90mm Surface Mounted - Galvanised and Powder Coated White

Part No.	Bollard Diameter	Bollard Height	Bollard Wall thickness	Bollard Base plate diameter	Brace Diameter	Brace wall thickness	Brace base plate L x W	Kgs	Finish
