

## Menni-Q Fixed Fence System

### Product Features:

- Impact absorbing materials are perfect for protection against forklifts.
- Menni modules offer protection from forklift tynes.
- Strong, flexible, lightweight and highly visible.
- Ease of assembly with design flexibility.
- Solid moulded colour.
- Virtually maintenance free.
- Maximum panel opening 80mm (child-safe).
- Panels can be cut down as required.
- Drainage channels prevent water pooling.

## Modular pedestrian separation fence

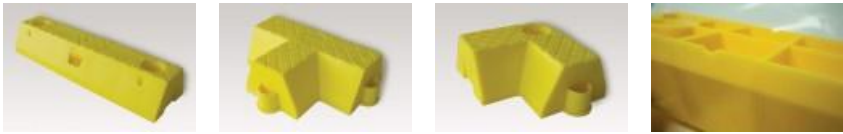

Menni-Q is a modular pedestrian separation fence system that is impact absorbing, non-conductive, corrosion and abrasion resistant and can be used indoors and outdoors.

The modular nature of Menni-Q provides a high degree of design flexibility. The components are moulded from Linear Low Density Polyethylene (LLDPE) with solid colour.

This ensures an extremely durable fence system that is highly visible, won't fade, rot, rust or crack and is almost completely maintenance free.

Part Numbers

Code	Image	Product Name
MQ2130		Menni-Q Pedestrian Fence Panel 2130mm Long - Polyethylene Hi-Vis Orange

Description:	Modular pedestrian separation fence.
Material:	Blow moulded polyethylene panels and Menni LLDPE modules. Fibre reinforced plastic internal posts.
Finish:	Solid colour Hi-Vis Orange panels. Solid colour Yellow Menni modules.
Height:	1000mm (floor to top of panel).
Length:	2130mm.
Weight:	10kgs/metre panels and Menni (approx.)
Fixings:	Supplied.

**FRP posts:** The internal posts used in Menni-Q are manufactured from 50mm diameter Fibre Reinforced Plastic with a 5mm thick wall. FRP combines incredible strength with flexibility, allowing the Menni-Q fence to absorb considerable impact without damage.
