

Round Rubber Hump Medium Duty

Product Features:

- Full load bearing contact area with road surface.
- Convenient modular system can be configured to any length.
- All modules supplied with fixings.
- Concealed fixings remain accessible.
- Shock absorbent rubber is quiet and smooth.
- Rubber construction conforms to uneven surfaces.

Traffic calming rubber humps for standard duty applications

Traffic calming rubber humps are designed for use when traffic speed control is necessary for pedestrian safety but a traditional speed hump is not suitable. Smoother approach and departure angles mean a wider range of vehicles can pass over them.

Solid rubber construction means these traffic calmers are capable of handling standard to heavy traffic.

Code	Image	Product Name
