

Galvanised U-Bars Double Rail Steel

One-piece double rail u-bars

A modular one-piece design U-bar barrier with fully welded knee rail. Suitable for pedestrian barriers at crossing points or traffic management in and around factory/warehouse areas.

Manufactured from 3mm wall steel pipe 48mm in diameter and hot dip galvanised as standard. Available in either surface mount or below ground models. All models stand 1051mm high above ground with a fully welded knee rail at 570mm high.

Ideal for schools, shopping centres, walkways or warehouses. The fully welded and galvanised one-piece construction makes installation a quick and simple operation. No assembly required.

Product Features:

- Three sizes available in below ground or surface mount models.
- Heavy 3mm wall, 48.3mm diameter pipe.
- Fully welded one-piece construction.
- All models are galvanised and powder coated or galvanised only.
- Supplied ready for installation with no assembly required.
