Adding Permissions to Article Topics

When you configured the permissions for the Anonymous group, you added the `tiki_p_read_article` permission. This allows anonymous visitors to read articles.

Tiki's robust permissions system makes it easy to add different permissions to different article topics.

1. From the Articles menu in the Menu module, click **Admin Topics**.

![Image of Admin Topics option in the Articles menu.]

2. The Admin Topics page appears. Click the **Permissions** icon ( ) for the article topic that you created earlier.

![Image of Admin Topics page list the article topics and allows you to create new topics.]

3. The Assign permissions to topic page appears. Click the **Edit Permissions** tab.

4. In the Assign permission to this object area, assign the `tiki_p_read_article` permission to the **Registered** group and click **Assign**.

![Image of Assign permissions to this object page.]

Making the article topic readable only to Registered users.

Tiki saves the information and reloads the page.

![Image of Current permissions for this object page.]

Now only Registered users can read the topic.

Now log off as the admin. As an anonymous user, if you try to list the articles, Tiki shows that there are no articles available:
Anonymous users cannot access the article.
