Changing Themes

You can use the Administration: Look and Feel page to configure the default theme for your Tiki.

1. From the Control Panel page, click **Look & Feel**.

   □ **TIP**

   you can also access the Administration: Look & Feel page by clicking the **Theme** button in the Quick Admin area.

2. Click the **Theme** tab.

   Use the Administration: Look and Feel page to select the overall theme and style.

3. Use the **Theme** list to select the default theme for your Tiki and click **Go**.

   Some themes include an additional **Theme Options** field that you can use to modify the base theme. For example, if you select **Fivealive**, additional options appear that allow you to select a different theme for different sections:
Other common theme options include:

- **Fixed width**: If this is enabled, Tiki maintains a "fixed" (pre-set) width for the site, approximately 1,000 pixels wide.

- **Each group can have its own theme**: If this is enabled, you can select a unique theme for members of specific groups.

4. Click **Apply**. Tiki saves the information and reloads the page, with the new theme.

   **NOTE**
   You may have to clear your browser's cache to display the new theme.

Refer to the Tiki documentation for complete information on all of the theme options.

**TIP**
In addition to selecting an overall, default theme for your Tiki, you can let users choose their own theme. Enable the **Reg. users can change theme** option on the Administration: Login page.

**WARNING**
Some themes may not be compatible with your Tiki version. Review the Tiki release notes and Theme-specific readme files for details.

### Using the Switch Theme Module

Tiki includes a Switch Theme module that lets users switch to different themes on-the-fly.

You must enable the **Users can change theme** option on the Admin: Look and Feel page to allow users to switch the theme.
Allowing users to switch the theme.
You can also specify specific themes to allow users to select.
