Configuring the Blogs

Like its other features, Tiki's blogs are fully customizable. You can have as many different blogs on your site as you want.

From the Control Panels page:

1. Click **Blogs**.

2. The Administration: Blogs page lists all the options to customize your Tiki blogging system.

3. On the **General Settings** tab, in the Comments area, enable the **Blog post comments** feature. This will allow visitors to post comments to each of your blog entries.

   You can also specify the maximum number of comments to show per page (0 = no maximum) and default sorting order of the comments. Leave the other options as their default setting.

   Refer to the TikiWiki documentation for complete information on all the blog configuration options.
4. On the **Blogs Listing** tab, you can specify which fields appear, when listing the blogs on your site.

5. Leave the options as their default setting.

6. Click **Change Preferences**. Tiki saves the information and reloads the page.

### Listing the Blogs

To view all of the blogs on your site:

From the menu:

1. Select **Blogs > List Blogs**.

2. The List Blogs page shows the current blogs.

The visible columns in the listing are determined by the options you selected on the **Blog listings** tab.

Let's create a new blog.
