Configuring Tags

Tiki’s tagging system allows you to identify items (such as wiki pages or blog posts) with keywords... *tags*. Like its other features, Tiki’s folksonomy tags are fully customizable.

1. From the Administration page, click **Tags**.

   **TIP**

2. The Administration: Freetags page all the options to customize your Tiki tagging system.

3. Edit the following fields:
   - Disable the **Preload random tag** field.
   - Change the **Maximum number of tags in cloud** field to 10.

   Leave the other options as their default setting.

   **NOTE**
   Refer to the TikiWiki documentation for complete information on all the wiki configuration options.

4. Click **Apply**. Tiki saves the information and reloads the page.

   **TIP**
   You can use the **Cleanup unused tags** button to remove any tags that are not assigned to an object.
Listing the Tags

To view all of the tags in use on your site:

1. From the Main menu, click Tags.

2. Tiki displays an error message, telling you that there are no tags yet.

Let's start adding tags to some pages.
