Creating Article Topics

An article "topic" is a way for you to group articles that are about a similar subject. A brand new Tiki installation, like yours, contains no article topics.

From the Menu:

1. Select **Articles > Admin Topics**. The Article Topics page appears.

   The Admin Topics page appears. Use the Article Topics page to list the article topics and create new topics.

   ![Article Topics](image)

   **Add topic**

   **Name**: Enter a topic for your articles. For example, you can create a topic named **Sports** for all sports-related articles on your site.

   **Image**: Click browse and select an image (in GIF, JPG, or PNG format) from your PC to represent this topic. This is optional, but will help your website's visitors.

   **TIP**

   For best results, use an image that is approximately 100x100 pixels.

2. Right now there are no topics. Use the Create a New Topic form to create a new article topic. Enter the following information in these fields:

   - **Name**: Enter a topic for your articles. For example, you can create a topic named **Sports** for all sports-related articles on your site.

   - **Image**: Click browse and select an image (in GIF, JPG, or PNG format) from your PC to represent this topic. This is optional, but will help your website’s visitors.

   ![TIP]

   For best results, use an image that is approximately 100x100 pixels.

3. Click **Add** to create the topic. Tiki saves the information, uploads the image you selected, and reloads the page with your newly created article topic.

   ![Topic]

Now that you have created a topic, you should configure the article types.
